

## Cleaning Supplies List

- [Bounty Quick-Size Paper towels](#) – essential for wiping up wet messes, great for wiping surfaces dry for a spot-free clean
- Duster – to easily whisk away dirt from surfaces
- Microfiber cloths – to use with cleaners to wash surfaces without scratching
- Old rags – for drying floors after mopping
- Squeegee – makes window, glass, and shower cleaning a breeze
- Rubber gloves – to protect your hands from harsh cleaners
- Spray bottle – essential if you make your own cleaners or buy cleaning solution in bulk
- Scrub brush – for stubborn stains and mildew
- Toilet brush – because the toilet is the only place you'll use this
- Old toothbrush – for crevices and small spaces where grime accumulates
- Vacuum – to suck away dirt throughout the house
- Broom – to sweep up larger residue than the vacuum can handle, and to keep the porch, walkway, and garage clean
- Dustpan – to make it easier to dispose of the dirt and debris you sweep up with the broom
- Mop – to wash away all the germs on your hard floors
- Bucket – great for cleaning with concentrates so you can dilute easily, either for mopping, washing the car, or cleaning the bathroom
- Glass cleaner – for windows, glass furniture, and mirrors
- Multipurpose cleaner – for most hard surfaces like counters, walls, and appliances
- Disinfectant – to kill harmful bacteria, especially in the kitchen and bathrooms

## Cleaning Supplies List

- Mild abrasive cleaner – helps get burned on food off of drip pans and toaster ovens, also great for soap scum
- Furniture polish – helps protect your wood furniture and keeps it looking new
- Floor cleaner – depending on what your floors are made of, they'll need special care so a dedicated floor cleaner is important
- Oven cleaner – just about the only thing that makes cleaning the oven and grill grates somewhat easy
- Distilled white vinegar – can fill in for multipurpose and glass cleaners and can also disinfect
- Isopropyl alcohol – for areas where germs are a major concern
- Olive oil – a wonderful all-natural way to polish wood
- Hydrogen peroxide – another great disinfectant, works wonders on mildew, and partnered with dish soap can get out a variety of stains
- Baking soda – great for cleaning bathroom sinks and tubs since it whitens and acts as a mild abrasive
- Salt – use instead of a mild abrasive cleaner to tackle soap scum and drip pans
